PROJECTS

Travelling Information Website

Oct 2020 to Present

<https://liveitin.000webhostapp.com/>

The website provides travelling informationin which a user can see the info about different places,and can also plan a trip accordingly.

Weather-app(Nodejs)

Mar 2021 to Present

<https://jayen-weather-application.herokuapp.com/>

I have created a weather-app using nodejs,expressjs.A user can search for the city or area for which he is wishing to see the weater inforamation.So i have used two apis.One for fetching latt,long of the area and second for fetching weather information for that latt,lang.Also i have deployed it on heroku.
